

## Success Criteria List

1. The site shows correctly on all browsers
  - a. **Met**, all elements successfully showed up on 7 different browsers, Google Chrome, Microsoft Edge(Chromium Based), Microsoft Edge(Non-Chromium), Vivaldi, Opera, Mozilla Firefox, and Brave Browser
2. Users can sign up.
  - a. **Met**:Users can enter personal information in order to create an account with all information successfully transferred into the database
3. Users can log in.
  - a. **Met**:Users can log in when credentials are correct and are unable to login if credentials are incorrect
4. Data can be imported and exported to and from the database consistently without fail.
  - a. **Met**:Data was imported and exported consistently without fail
5. Users can request relevant data about their packages. (When it was ordered, how much it cost, etc)
  - a. **Incomplete**: The time frame did not allow for this to be implemented.
6. The site can connect customers to support representatives
  - a. **Incomplete**: The time frame did not allow for this to be implemented.
7. A short but skippable tutorial is shown upon the first launch/registration which can be replayed at any time.
  - a. **Incomplete**: The time frame did not allow for this to be implemented.
8. The site can convert between various currencies on the spot.
  - a. **Incomplete**: The time frame did not allow for this to be implemented.
9. Some sort of translation system that is tied into Google Translate or some other translation platform.

a. **Incomplete:** The time frame did not allow for this to be implemented.

10. The user interface has to be intuitive and relatively easy to navigate.

a. **Semi-Complete:** The small amount of user interface that has been implemented was easy to navigate for several beta-testers with no beta-testers being confused on how to register and log-in
